PROBLEM

Evidence Based Practices Contributors to “POVERTY”

1. Building and Evidence-Based Practice of **Action Civics**

A new community of researchers and practitioners organized the NCAA. This group of researchers and educators draws both: youth development and civic education.

2. Evidence-Based **Teen Pregnancy Prevention Programs**

This EBP aids in the education of reducing rates of teen pregnancy and births, sexually transmitted infections or sexual risk behaviors in communities who suffer from high rates and poverty; focusing on African Americans and Latino or Hispanic young people aged 15-19.

3. Cognitive-Behavioral Therapy (Alcohol, Marijuana, Cocaine, Methamphetamine, Nicotine) - EBP

A central element of CBT enhancing self-control by helping the development of effective coping strategies. Specific techniques include exploring the positive and negative consequences of drug use, self-monitoring to recognize cravings & avoiding those high-risk situations..

INTERVENTION
